PROFESSIONAL SUMMARY

Full Stack Developer with 9 months of experience building and deploying production features for a US-based startup on multi-tenant SaaS platforms serving 3,000+ active users. Skilled across React, Next.js, Node.js, and PostgreSQL, with experience in REST API development, containerized AWS deployments, and Redis-backed performance optimization. Comfortable owning features end-to-end in agile teams, from sprint planning through code review to production deployment.

PROFESSIONAL EXPERIENCE

SDE Intern | LeaderHub

Aug 2024 – May 2025

US-based startup, Remote | [Letter of Recommendation](#)

- Built and shipped full-stack features for two production platforms (Definite.im and AgenticWeb.im) using React, Next.js, Node.js, Spring Boot, and PostgreSQL, supporting a combined user base of 3,000+ across multi-tenant environments
- Developed 15+ secure REST API endpoints and reusable, responsive UI components with Tailwind CSS, cutting average feature turnaround time by ~20% through shared component patterns
- Deployed containerized services on AWS EC2 using Docker and integrated Redis for session management, reducing average API response latency by approximately 30%
- Refactored critical frontend onboarding flows and backend endpoints, contributing to a ~15% improvement in new-user onboarding completion rate
- Collaborated in agile workflows using Jira and GitHub across two-week sprints sprint planning, peer code reviews, and iterative releases with a cross-functional team of 6+ engineers
- Maintained technical documentation and enforced code quality through consistent Git version control and structured PR reviews

PROJECTS

AI Interviewer | AI-Powered Voice Interview Platform | [github repo](#)

- Built a GenAI-powered voice interview platform conducting real, bidirectional voice mock interviews over a low-latency WebRTC pipeline using LiveKit and Google's Gemini Live native-audio model
- Implemented semantic skill-gap analysis parsing a candidate's resume against a target job description to auto-generate a tailored interview question set
- Built a Python LiveKit agent with server-side VAD and turn detection, logging transcripts to an Express/Prisma API and scoring sessions with Gemini + a Pydantic rubric, persisted to PostgreSQL

Tech Stack: React, TanStack Router, Node.js, Express, Prisma, PostgreSQL, LiveKit (WebRTC), Python, Google Gemini Live API, Tailwind CSS

YourGuide | AI-Powered Trip Planner | [Demo Link](#)

- Built a React application that generates personalized, multi-day trip itineraries using the ChatGPT API, with real-time hotel recommendations and location mapping via the Tripadvisor API
- Designed a fully responsive Tailwind CSS interface tested across desktop and mobile breakpoints

Tech Stack: React, ChatGPT API, Tripadvisor API, Tailwind CSS, HTML
